Introduction

The following report provides a summary of the Career Readiness West Virginia analysis and recommendations for Upshur County. To assess the Growth, Decline, and Opportunities facing both education and local industry, Forge Business Solutions worked with the members of the Upshur County Board of Education and the Buckhannon-Upshur Chamber of Commerce through the **Career Readiness West Virginia initiative**.

The Career Readiness West Virginia initiative is a collaborative partnership developing a sustainable future for the next generation of the workforce. The model brings together public education and local chambers of commerce to partner with public and private sector employers, government, trades and contractors, and nonprofits to drive career and workforce development in local communities.

To gather insight on local industry trends, career opportunities, and active community partnerships, Forge distributed a multi-county online survey via SurveyMonkey to business leaders and employers throughout the Greater Upshur County Region. The survey respondents completed the online Career Readiness West Virginia: Questionnaire 2020 (refer to Appendix A) and their responses were documented (refer to page 9).

Additionally, Forge examined economic data, reviewed current partnerships and collaborations, and investigated relationships that can be created or enhanced. Through this work, Forge determined where collaboration can be fostered to develop a sustainable partnership model between local industry, public school districts, and Career Technical Education.

Forge has identified seven activities in which industry and education can collaborate to support workforce development: **Internships, Speakers' Series, Job Shadowing, Job Fairs, Integrated Pathways, Career Exploration, and Workplace Tours**.

Our sincere appreciation goes to Superintendent Dr. Sara Stankus and Tammy Reger, Director of the Buckhannon-Upshur Chamber of Commerce, for their dedication to their community and support of Career Readiness West Virginia.

Upshur County Schools

County Population: 24,176

Upshur County Summary

Forge Business Solutions utilized data and facts from the U.S. Census Bureau, West Virginia’s Bureau of Business and Economic Research *Economic Outlook 2020-2024 Report*, WorkForce West Virginia, and FRED Economic Data, as well as additional resources throughout the following report. All references and resources are included near the end of the report. It is important to note that some of the data collected to compose this report was gathered prior to the onset of the Coronavirus pandemic.

Located in central West Virginia, Upshur County is home to Buckhannon (county seat), as well as other towns and unincorporated communities. As of 2019, Upshur County’s population was 24,176, but the county has experienced a slight decline of 0.3% in the total population since 2010.

The local community benefits from the educational and technical institutions West Virginia Wesleyan College and Fred W. Eberle Technical Center; these institutions

support local economic development by enriching the regional workforce through offering varying degree programs, professional and continued education programs, and career certifications.

According to the Data USA 2017 report, the leading industries in Upshur County are Care & Social Assistance, Retail Trade, and Educational Services. The most common jobs held by residents of Upshur County (by number of employees) are Office & Administrative Support Occupations, Construction & Extraction Occupations, and Sales & Related Occupations. Additionally, the highest paid jobs held by residents of Upshur County (by median earnings) are Computer & Mathematical Occupations, Health Diagnosing & Treating Practitioners & Other Technical Occupations, and Computer, Engineering & Science Occupations.

As a top employer in the county, Upshur County Schools serve about 3,737 of the community’s students with Buckhannon-Upshur High School, and the supporting middle and elementary schools. As reported in 2017, there are 530 employers in Upshur County, many of whom are members of the Buckhannon-Upshur Chamber of Commerce. While there is existing engagement between education and industry, Upshur County Schools and local community leaders recognize the need to further enhance and expand career opportunities for students in collaboration with businesses in the community. Additionally, many community members communicated their support and dedication toward developing and implementing the [Career Readiness West Virginia partnership model](#).

West Virginia Overview

West Virginia's small population of 1.8 million has helped the state develop a strong sense of community and pride. Despite the camaraderie, its citizens face challenges that prompt many to move out of the state. Understanding the current state of West Virginia's economy is important in developing a plan for an improved future for West Virginia students.

Population

Since 2012, West Virginia's population has declined by nearly 51,000 and is projected to continue to regress over the next five years. West Virginia has one of the oldest populations and highest mortality rates in the country, heavily contributing to the declining population. However, the state's Eastern Panhandle has exhibited enormous growth over the past decade due to positive net migration and natural population growth.

Labor Participation

Low labor participation rates hinder potential economic prosperity in West Virginia. Less than 54% of West Virginia's adult population is working or looking for work, leaving the state with the lowest labor force participation rate in the nation. The labor participation rate varies throughout the state; the rate trends higher in the Eastern Panhandle, North Central, and Metro Valley regions, and lower in the rural areas.

The opioid epidemic significantly affects the state's workforce participation rate. West Virginia leads the nation in drug-related deaths, nearly triple the national average. In 2017, 58 out of 100,000 West Virginians died due to drug misuse. The prime workforce participation demographic is individuals ages 25-54; however, these individuals are also the most affected by the opioid epidemic.

Another factor that impacts labor force participation is inadequate educational outcomes. A lack of education, skills, and training leaves adults unable to secure a career. The North Central, Eastern Panhandle, and Metro Valley regions exhibit the highest rates of education attainment in the state.

Future economic development strategies should focus on improving health outcomes, lowering drug abuse, and advancing education and vocational training opportunities in the state to make West Virginia’s workforce more appealing to potential businesses.

Career Readiness West Virginia: Questionnaire 2020

Forge Business Solutions collaborated with Upshur County Schools and the Buckhannon-Upshur Chamber of Commerce to distribute a multi-county online survey from April 17 to May 15, 2020, to business leaders and employers throughout the Greater Upshur County Region. In total, 12 survey respondents completed the online Career Readiness West Virginia: Questionnaire 2020 via SurveyMonkey from the Greater Upshur County Region. Given the changing nature of the economy in the midst of the COVID-19 pandemic, survey questions were developed to assess industry growth, decline, and opportunities before the pandemic, as well as to gauge the current state of local industry as the pandemic continues to unfold.

The following subsections summarize the responses collected from the survey participants of the Greater Upshur County Region. The responses may contain opinions that do not represent the research or thoughts of Forge. An example of the questionnaire is located in Appendix A.

Local Industry Trends (Pre COVID-19 Pandemic)

Growth

- Tourism
- Medical
- Small Businesses
- Coal
- Natural Gas
- Construction
- Consumer Staples Retail
- Health Care
- Pharmaceutical
- Manufacturing
- Entertainment
- Locally Sourced Items
- Service
- Mechanical

Decline

- Oil
- Gas
- Dining
- Tourism
- Travel
- Personal Services
- Plumbing
- Electrical
- Painting

Potential Opportunities

- Niche Small Business
- Service Sector
- Financial/Lending
- Accounting/Tax
- Mental Health
- Education Fields
- Skilled Labor

COVID-19 Impact on Local Industry

Industries That Have Been Negatively Impacted

- Aviation Industry

- Oil and Gas
- Restaurants
- Hair Salons
- Tourism
- Travel
- Automotive
- Stone Tower Brews
- Hotels
- Small Shops / Boutiques
- Direct Sales
- Entertainment
- Personal Service

Industries That Have Been Positively Impacted

- Information Technology Industry
- Food Industry
- Large Chain Retail
- TV Subscriptions
- Grocery Sector
- Wal-Mart
- Kroger
- Delivery services; however, that's limited in rural areas like Buckhannon.
- Manufacturing
- Essential Retail
- Box Store Grocery Pickup
- Meal Delivery
- Medical
- Home Improvement

Industries That Have Not Been Affected

- Legal and Education
- Lowe's; Fish Hawk Acres

The Pandemic's Impact on Local Organizations

- Due to COVID-19, we no longer have the ability to provide hands-on educational training experiences for students in programs such as welding, aviation.
- No public meeting or work projects
- Healthcare impacted - due to elective procedure restrictions
- With the market, tough for transfer/rollovers, but people more open to financial planning
- We have a significant loss of revenue. Many advertising projects are on hold until our finances stabilize.
- Clients reluctant to move forward in securing contracts due to workforce risk and vulnerability.

- Remote work, fewer patient visits
- Lack of workers

Job Market Outlook (Pre COVID-19 Pandemic)

The current opportunities in the local job market for those with a...

4-year Degree or Greater

- Teaching
- Healthcare
- Business
- Legal
- Accounting
- Banking
- Tax Preparation
- Insurance
- Finance
- Medical
- Sales Personnel

2-year Degree

- EMTs
- Respiratory Therapists
- Nurses
- Teaching
- Healthcare
- Grocery Services
- Automotive
- Medical
- Retail
- Legal

Technical Certification

- Welding
- Truck Driver
- Construction
- Automotive
- Manufacturing
- Natural Resources
- Oil and Gas
- Auto Repair
- Electrical

- Heating/Cooling
- Plumbing

High School Diploma or GED

- Construction
- Maintenance
- Retail and Food Service
- Automotive
- Recreation
- Mechanical
- Service
- Associates
- Fast Food Industries

No High School Diploma or Certification

- Construction
- Maintenance
- Retail and Food Service
- Secretarial
- Food Service
- Wal-Mart
- Lowes
- Kroger
- Retail Workforce
- Mechanical
- Fast Food Industries

Top Characteristics Employers Seek in Potential Employees

- Team Oriented
- Reliable
- Truthful
- Work Ethic
- Pride of Job
- Dependability
- Problem-Solving
- Flexibility
- Communication
- Honesty
- Professional
- Enthusiasm
- Excellent person-to-person communication skills
- Thorough thought processing and planning

- Energetic about the field they're working in
- Kindness
- Language Skills
- Deductive Reasoning
- Problem Solving
- Social Skills
- Motivation
- Loyalty

Opportunities for Those with Disabilities (Pre COVID-19 Pandemic)

Job Opportunities

- IT
- Manufacturing
- Service Sector
- Retail
- Limited
- Several companies locally hire persons with disabilities
- Service

Local Support/Programs

- Ongoing partnerships with local Vocational/Rehabilitation Services to actively recruit potential candidates
- Provide more online; internet services
- Our organization is as accommodating as possible to support staff people with a disability.
- Reasonable accommodations
- We work with our disabled employees to help them excel.
- Job development and experience

Opportunities for Those Serving in the National Guard and Reserves (Pre COVID-19 Pandemic)

Job Opportunities

- Healthcare
- Business
- Retail
- Construction
- Law Enforcement
- Medical, Construction
- Oil and Gas
- Finance
- All Industries

Local Support/Programs

- Local VA
- Give the assistance that our students need (i.e., help navigate admissions, leverage benefits, manage the impact of deployments and more)
- Partner local agencies to actively recruit potential candidates
- No opportunities available

Engagement with Education And/or Economic Development (Pre COVID-19 Pandemic)

- Through facilitation agreements to provide onsite educational experiences through clinical rotations
- Developing an internship program
- We participate in any discussions with our public education partners. We serve as a site for college students to serve for community service hours, as well as appear as guest speakers for various educational meetings.
- Assist with training/development
- Partnerships with local chamber and business boards
- Member of the chamber of commerce
- We're engaged with tourism related development, provided support through our organization and connecting those businesses with other local & state services.
- Involved in chamber, and several community organizations

Barriers/Concerns for Collaboration with Education

Pre COVID-19 Pandemic

- Due to the nature of the business, requires long-term growth and interaction
- We collaborate with our BOE to help develop high schoolers into employable people
- No concerns at this time

Post COVID-19 Pandemic

- Once video / telecommunications become more normal, I think collaborating will become much easier.
- No concerns at this time

Recommendations

The Career Readiness WV model is student-centered. In an effort to increase workforce participation and improve job growth in the Upshur County area, collaboration between education providers at all levels and the business community is imperative. The following activities and organizations are recommended.

Workplace Tours

The Upshur County School District would benefit from preparing an annual master calendar of workplace tours with a variety of local employers for elementary, middle, and high school students. The workplace tours should be appropriate for the schools' respective grade levels.

Educators need to ensure students are learning about occupations available at every level of education: high school diplomas, certificates, 2-year degrees, and beyond. Employers and educators need to stress the importance of a knowledge-based, drug-free workforce. An emphasis should be placed on jobs in STEM-related areas.

Speakers' Series

In a centrally organized manner, speakers should be scheduled to present various occupations to K-12 students. These occupations should represent varying skillsets and levels of education. Career and Technical Education should be the emphasis of the speakers' series.

When possible, involving parents who are subject-matter experts in their field of practice should be utilized. For areas where parents don't have the expertise, other speakers should be sought out to ensure students are getting a wide range of occupational exposure.

Job Shadowing

Each school should have an opportunity to engage in job shadowing for a wide range of occupations. These opportunities must be safe and appropriate for the students. Job shadowing should not be limited to parents and their occupations, as many students may not have parents who are employed. Every student must have an opportunity to participate.

Job Fairs

All middle and high schools should participate in at least one annual job fair and/or reverse job fair. Job fairs should be age-appropriate and, when possible, on school premises. The idea behind job fairs is not only to offer jobs to high school graduates but to expose students to as many occupations and industries as possible.

Additionally, relationships between employers and future employees can be established at an earlier level, allowing students to focus on career opportunities with a clear understanding of how to obtain and excel in a specific career.

Interview skills, with an emphasis on communication, should be developed as soon as possible. Elementary schools should offer career day opportunities where subject-matter experts visit classrooms to discuss a variety of occupations and industries. Feedback from participating employers should be collected and utilized by educators to improve each job fair event.

Internships

Local employers should offer internships (paid or unpaid) as long as safety is ensured, positions are approved by the school district, and tasks are age-appropriate. Feedback should be collected and evaluated from both employer and student perspectives.

Internships should represent a wide range of occupations and varying levels of education. Special attention should be paid to ensure that students with fewer resources have an equal opportunity to be considered. A program should be established to recognize participating students for their work and success.

Integrated Pathways

Public education, community and technical colleges, and higher education institutions should collaborate to ensure students have an efficient and secure way to obtain varying levels of education necessary to secure a job and advance within their career fields. Educators should be embedded in all levels of workforce development and career readiness. This will ensure their awareness of the skillsets, knowledge, and degrees required by industries and employers.

Additional Recommendations

Upshur County should consider its top employers as a primary resource for career readiness. Those employers are:

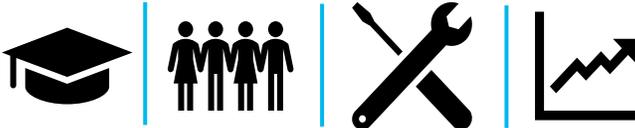

- Upshur County Board of Education
- WVU Medicine
- West Virginia Wesleyan College
- Weyerhaeuser NR Company
- Wal-Mart
- Saint-Gobain Industrial Ceramics
- Res-Care
- Lowe's Home Centers
- City of Buckhannon
- Central WV Aging Service

Upshur County Schools and the Buckhannon-Upshur Chamber of Commerce should apply the Career Readiness WV model and provide guidance to the local career readiness advisory committee (assembled from its local stakeholders). Strategic partnerships should be developed not only with existing businesses, but also with emerging industry leaders; both the large and small businesses should be engaged in this process.

The Career and Technical Education centers should offer open houses to employers in the Upshur County area and surrounding counties that showcase the programs and skillsets being developed and deployed. An annual employer-sponsored professional etiquette workshop should be offered to students and parents.

Students with Disabilities

For students, the most common learning disabilities are ADHD, mental illness, orthopedic disabilities, hearing disabilities, and dyslexia. Post-secondary education and the workforce often have a stigma toward persons with disabilities, further challenging those students. The possible negative perceptions encourage many to conceal their disabilities after high school. Securing accommodations in the workplace can be a long,

cumbersome process; due to these challenges, only 46% of adults with disabilities are employed. Those with disabilities are more likely to work part-time jobs and attend college at half the rate of the general population.

When entering the workforce, only 19% of those with disabilities report their disability to their employer and only 5% receive accommodations. These statistics show how critical it is for a partnership between education and industry to utilize a uniquely skilled workforce. Steadily transitioning those with an individualized education plan (IEP) into the workforce or schools providing technical certificates/2-year degrees will allow local businesses to continue improving their talent pool and communities.

The community can specifically help persons with disabilities by building their self-confidence. Focusing on an individual's strengths, rather than weaknesses, will help him or her develop a positive self-image. Additionally, eliminating a negative stigma will help students with disabilities enter the workforce. Providing essential accommodations for those with disabilities will encourage others to self-report their disability.

In Upshur County, 9.7% of the population under the age of 65 has a disability, compared to the state average of 14.1%. In West Virginia, strides are being taken to improve the lives of those with disabilities. Currently, the WV Division of Rehabilitation Services helps those with disabilities find work. The organization partners with Workforce West Virginia and the West Virginia Adult Education to develop a positive path forward for local communities.

Military Service

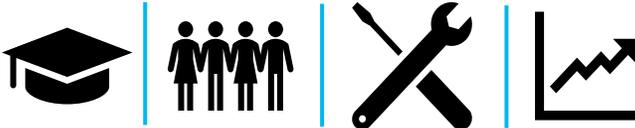

The military provides various opportunities for students. Students can choose standard enlistment, delayed enlistment, or ROTC programs. If students choose to enlist, they still have the opportunity to attend college and trade schools through the GI Bill, grants, and scholarships. These integrated pathways allow students the opportunity to build on skills, experience, and knowledge for continuous learning and growth.

Members from all branches of the military stationed within West Virginia

Branch	Active	Reserve	Total
Army	67	1780	1847
Navy	3	76	79
Marine Corps	37	96	133
Air Force	18	0	18
Coast Guard	64	9	73
Army National Guard			4172
Air National Guard			2125

Data reported September 2019. Source: https://www.dmdc.osd.mil/appj/dwp/dwp_reports.jsp

In addition to opportunities within the state for military service, many West Virginians choose to enlist in the military and return home after their service. This has made West Virginia home to over 138,508 veterans (not including National Guard/Reserve unless called to active duty) and 1,714 reside in Upshur County. These veterans provide unique skills, experience, and knowledge acquired during their service.

Professional Development

As part of the district’s professional development program for teachers and administrators, Upshur County should include employers and occupational specialists as speakers for its professional development program. This will provide educators with a better understanding of the demand for skillsets and key employee characteristics within the local economy.

Conclusion

Local business and community leaders should be surveyed on an annual basis to gather feedback and innovative ideas. This will catalyze continued growth and development of the Career Readiness WV model. The success of West Virginia’s economy greatly depends on diversification; local districts are not limited to the current industry landscape and should ensure students are being exposed to careers through a global lens. As new businesses and industries emerge, they will need to be supported with a unique and diversified labor force. It is important for education to prepare students for the rapidly changing job market to allow West Virginia students to thrive throughout their future careers. Together, education and local industry can initiate new relationships and collaborations that allow students to acquire a deeper knowledge of careers, preparing them for a successful future.
